

Cosmetic Chemist

A 20 year old established and expanding skin care company requires a cosmetic chemist. This GTA company is looking for an individual that is experienced in Quality Control and has familiarity with Good Manufacturing Practices (GMP)

As a cosmetic chemist, you must have at least an undergraduate degree in chemistry, biochemistry, chemical engineering or a related field.

The position requires understanding and experience within the industry, with a minimum of 2 years working in personal care. Familiarity in process, surfactants, emulsions, formulating, batching, testing and related paperwork. Must be experienced enough to establish protocols and procedures in our upcoming GMP environment.

This is a Monday to Friday day shift position which involves working with compounders and the lab. There are no colour cosmetics, just personal care items like lotion, creams, hair and face care.

The company is dynamic, with both an internet presence and multiple private label customers. We offer a pleasant work environment, minimal turnover and multiple benefits .

Wages coincide with experience, starting at \$40,000
